Table of contents

EDITORIAL REVIEW

Mechanism of the antimineralocorticoid effects of spirolactones. *P. Corvol, M. Claire, M. E. Oblin, K. Geering, and B. Rossier.* 1

LABORATORY INVESTIGATION

Acute reversible proteinuria induced by infusion of the polycation hexadimethrine. *Lawrence G. Hunsicker, Thomas P. Shearer, and Sandra J. Shaffer.* 7

Dependency of proximal tubular fluid transport on the load of glomerular filtrate. *D. A. Häberle, T. T. Shiigai, G. Maier, H. Schiffl, and J. M. Davis.* 18

Substrate oxidation by isolated single nephron segments of the rat. *Keith L. Klein, Maw-Song Wang, Shozo Torikai, Warren D. Davidson, and Kiyoshi Kurokawa.* 29

Characterization of acidification by the isolated perfused rat kidney: Evidence for adaptation by the distal nephron to a high bicarbonate diet. *Norihiko Terao and Richard L. Tannen.* 36

Effects of dexamethasone on renal and systemic acid-base metabolism. *Henry N. Hulter, Jerald F. Sigala, and Anthony Sebastian.* 43

Failure of increased sodium avidity to facilitate renal acid excretion in dogs fed sulfuric acid. *Jeffrey A. Kraut, Jay B. Wish, Stephen J. Sweet, Samuel S. Weinstein, and Jordan J. Cohen.* 50

Peristaltic flow of urine in the renal papillary collecting ducts of hamsters. *Larry N. Reinking and Bodil Schmidt-Nielsen.* 55

Intracellular electrolyte composition following renal ischemia. *June Mason, Franz Beck, Adolf Dörge, Roger Rick, and Klaus Thurau.* 61

Analytical cell fractionation of isolated rabbit renal proximal tubules. *J. Thomas Hjelle, Jean-Paul Morin, and André Trouet.* 71

CLINICAL INVESTIGATION

Nitrogen and urea metabolism during continuous ambulatory peritoneal dialysis. *Michael J. Blumenkrantz, Joel D. Kopple, John K. Moran, Gerald P. Grodstein, and Jack W. Coburn.* 78

Epinephrine and potassium homeostasis. *Ralph A. DeFronzo, Margaret Bia, and Guthrie Birkhead.* 83

Acute hypercalcemic hypertension in man: Role of hemodynamics, catecholamines, and renin. *Claudio Marone, Carlo Beretta-Piccoli, and Peter Weidmann.* 92

Renal filtration fraction, effective vascular compliance, and partition of fluid volumes in sustained essential hypertension. *G. M. London, M. E. Safar, J. A. Levenson, A. C. Simon, and M. A. Temmar.* 97

Chemical characterization of glomerular and tubular basement membranes of men of different ages. *Jan P. M. Langeveld, Jacques H. Veerkamp, Carla M. P. Duyf, and Leo H. Monnens.* 104

Pharmacokinetics of amikacin in children with normal and impaired renal function. *J. W. Lanao, A. A. Dominquez-Gil, A. Dominquez-Gil, S. Málaga, M. Crespo, and F. Santos.* 115

Evaluation of reduced dialysis frequency using nutritional therapy. *William E. Mitch and Daniel G. Sapir.* 122

NEPHROLOGY FORUM

Advanced renal cell cancer. *Marc B. Garnick.* 127

ABSTRACTS

Swiss Society of Nephrology 137

German Society of Nephrology 142

Table of contents

LABORATORY INVESTIGATION

Role of vasopressin in impaired water excretion in conscious rats with experimental cirrhosis. *Stuart L. Linas, Robert J. Anderson, Stephen J. Guggenheim, Gary L. Robertson, and Tomas Berl.* 173

Phosphatase activity along the nephron of mice with hypophosphatemic vitamin-D-resistant rickets. *Michele G. Brunette, Meanthan Chan, and Manon Lebrun.* 181

Filtration in single isolated mammalian glomeruli. *Virginia J. Savin and Daniel A. Terreros* 188

Pathophysiology of acute Bence-Jones protein nephrotoxicity in the rat. *Jay H. Weiss, Robert H. Williams, John H. Galla, Jerome L. Gottschall, E. Douglas Rees, Dinyar Bhathena, and Robert G. Luke.* 198

Shape of cells and extracellular channels in rabbit cortical collecting ducts. *Larry W. Welling, Andrew P. Evan, and Dan J. Welling.* 211

Quantitative changes in the canine glomerular vasculature during development: Physiologic implications. *Eunice John, David I. Goldsmith, and Adrian Spitzer.* 223

Intraglomerular microcirculation: Measurements of single glomerular loop flow in rats. *Michael Steinhausen, Bernd Zimmerhackl, Heinz Thederan, Rudolf Dussel, Niranjan Parekh, Hans-Ulrich Eßlinger, Gunther von Hagens, Dymitr Komitowski, and Frederick D. Dallenbach.* 230

CLINICAL INVESTIGATION

Sodium intake and renal responses to captopril in normal man and in essential hypertension. *Norman K. Hollenberg, Leonard G. Meggs, Gordon H. Williams, Jack Katz, J. Daniel Garnic, and Donald P. Harrington.* 240

Mechanisms of autonomic nervous system dysfunction in uremia. *Vito M. Campese, Mark S. Romoff, Daniel Levitan, Kenneth Lane, and Shaul G. Massry.* 246

Pneumococcal vaccination in patients with chronic renal disease and renal allograft recipients. *Fernando G. Cosio, G. Scott Giebink, Chap Than Le, and Gerald Schiffman.* 254

Responsiveness of plasma renin and aldosterone in diabetes mellitus. *Carlo Beretta-Piccoli, Peter Weidmann, and Gerald Keusch.* 259

Abnormalities of T-cell subsets in glomerulonephritis and systemic lupus erythematosus. *Lucienne Chatenoud and Marie-Anne Bach.* 267

Development of anergy to delayed-type hypersensitivity antigens following renal allotransplantation. *R.D. Guttman, J.L. Meakins, D.D. Morehouse, and C. Milne.* 275

TECHNICAL NOTES

Three exchanges with a 2.5-liter volume for continuous ambulatory peritoneal dialysis. *Zbylut Twardowski and Lucyna Janica* 281

Antibodies to glomerular basement membrane: Detection by an enzyme-linked immunosorbent assay in the sera of Brown Norway rats. *Jo H. Michaelson, J. Philip McCoy, Jr., and Pierluigi E. Bigazzi* 285

NEPHROLOGY FORUM

Prostatitis. *Edwin M. Meares, Jr.* 289

Table of contents

LABORATORY INVESTIGATION

Muscle degradation in uremia: 3-Methylhistidine release in fed and fasted rats. *Jeanne B. Li and Steven J. Wassner.* 321

Mechanism by which enhanced ammonia production reduces urinary potassium excretion. *Sithiporn Sastrasinh and Richard L. Tannen.* 326

Stimulation by oxygen radicals of prostaglandin production by rat renal glomeruli. *Laurent Baud, Marie-Paule Nivez, Dominique Chansel, and Raymond Ardaillou.* 332

Heterogeneity of the rabbit collecting tubule: Localization of mineralocorticoid hormone action to the cortical portion. *John B. Stokes, Mary Jo Ingram, Allen D. Williams, and Duane Ingram.* 340

Potassium recycling in the renal medulla: Effects of acute potassium chloride administration to rats fed a potassium-free diet. *Joe F. Arrascue, Dennis C. Dobyan, and Rex L. Jamison.* 348

Sites of ammonia addition to tubular fluid in rats with chronic metabolic acidosis. *Ilde M. Sajo, Marc B. Goldstein, Harold Sonnenberg, Bobby J. Stinebaugh, Douglas R. Wilson, and Mitchell L. Halperin.* 353

Luminal and antiluminal transport of glutamine in dog kidney: Effect of metabolic acidosis. *Melvin Silverman, Patrick Vinay, Leslie Shinobu, Andre Gougoux, and Guy Lemieux.* 359

CLINICAL INVESTIGATION

Dynamics of glomerular ultrafiltration following open-heart surgery. *Bryan D. Myers, Mark Hilberman, Brian J. Carrie, Robin J. Spencer, Edward B. Stinson, and Channing R. Robertson.* 366

Aluminum localization in bone from hemodialyzed patients: Relationship to matrix mineralization. *Giulia Cournot-Witmer, Johanna Zingraff, Jean Jacques Plachot, Françoise Escaig, Roger Lefèvre, Pierre Boumati, Agnès Bourdeau, Michèle Garabédian, Pierre Galle, Raymond Bourdon, Tilman Drüeke, and Sonia Balsan.* 375

Urinary excretion of prostaglandins and electrolytes in developing children. *Daniel Benzoni, Madeleine Vincent, Bruno Betend, and Jean Sassard.* 386

Clinical and pathophysiological spectrum of acquired distal renal tubular acidosis. *Daniel C. Batlle, John T. Sehy, Melvin K. Roseman, Jose A. L. Arruda, and Neil A. Kurtzman.* 389

Hyperosmolality, acetate, and lactate: Dilatory factors during peritoneal dialysis. *Frederick N. Miller, Karl D. Nolph, Irving G. Joshua, David L. Wiegman, Patrick D. Harris, and David B. Andersen.* 397

Changes in plasma 1,25- and 24,25-dihydroxyvitamin D after renal transplantation in children. *Michèle Garabédian, Caroline Silve, David Levy-Bentolila, Agnès Bourdeau, André Ulmann, T. Minh Nguyen, Michèle Lieberherr, Michel Broyer, and Sonia Balsan.* 403

TECHNICAL NOTE

Transillumination of renal biopsy specimens for rapid identification of glomeruli. *Lawrence G. Hefter and Gloria G. Brennan.* 411

NEPHROLOGY FORUM

Ketosis. *George F. Cahill, Jr.* 416

Table of contents

LABORATORY INVESTIGATION

Interactions of human, cultured kidney cells with the complement system. *Patricia J. Baker, Byron P. Croker, and Stephen G. Osofsky* 437

Mechanisms of action of various hormones and vasoactive substances on glomerular ultrafiltration in the rat. *Nestor Schor, Iekuni Ichikawa, and Barry M. Brenner* 442

Glomerular immune injury in the rat: The influence of angiotensin II and α-adrenergic inhibitors. *Roland C. Blantz, Bryan J. Tucker, Leslie C. Gushwa, Örjan W. Peterson, and Curtis B. Wilson* ... 452

Feedback-mediated reduction of glomerular filtration rate during infusion of hypertonic saline. *Jürgen Schnermann, Josephine Briggs, and Fred S. Wright* 462

Prostaglandin and thromboxane synthesis by rat glomerular epithelial cells. *Alice Stollenwerk Petrulis, Masamichi Aikawa, and Michael J. Dunn* 469

Mechanism of volume expansion on citrate, ammonia, and acid excretion in the rat. *Sheldon Adler, Donald S. Fraley, and Barbara Zett* 475

Renal handling of potassium in dogs with chronic renal insufficiency. *Jacques J. Bourgoignie, Michael Kaplan, Jillian Pincus, George Gavellas, and Alexander Rabinovitch* 482

Alterations in glomerular RNA in diabetic rats: Roles of glucagon and insulin. *Pedro Cortes, Francis Dumler, Kumarapuram K. Venkatachalam, Jose Goldman, K. S. Sury Sastry, Hema Venkatachalam, Jay Bernstein, and Nathan W. Levin* 491

CLINICAL INVESTIGATION

Antibodies to Tamm-Horsfall protein associated with renal damage and urinary tract infections in adults. *Anders Fasth, Ulla Bengtsson, Bertil Kaijser, and Jan Wieslander* 500

Brain metabolism of amino acids and ammonia in patients with chronic renal insufficiency. *Giacomo Deferrari, Giacomo Garibotto, Cristina Robaudo, Gian Marco Ghiggeri, and Alberto Tizianello* 505

Suppression of tubular anion transport by an inhibitor of serum protein binding in uremia. *Thomas A. Depner* 511

Cyst fluid antibiotic concentrations in polycystic kidney disease: Differences between proximal and distal cysts. *Richard S. Muther and William M. Bennett* 519

Noninvasive characterization of renal artery blood flow. *Ernest R. Greene, Michael D. Venters, Pratap S. Avasthi, Richard L. Conn, and Robert W. Jahnke* 523

NEPHROLOGY FORUM

Monoclonal antibodies in renal transplantation: Preliminary results. *Paul S. Russell* 530

Table of contents

EDITORIAL REVIEW

An hypothesis to explain the ultrafiltration characteristics of peritoneal dialysis. *Karl D. Nolph, Frederick N. Miller, W. Keith Pyle, Robert P. Popovich, and Michael I. Sorkin.* 543

LABORATORY INVESTIGATION

Investigation of cytoplasmic contractile and cytoskeletal elements in the kidney glomerulus. *Peter M. Andrews.* 549

Enhancement of peritoneal dialysis clearance with docusate sodium. *Cindy B. Dunham, Lawrence J. Hak, J. Heyward Hull, and Albert M. Mattocks.* 563

Effect of hypochloremia on loop segment chloride and solute reabsorption in the rat during volume expansion. *John H. Galla, Kent A. Kirchner, Theodore A. Kotchen, and Robert G. Luke.* 569

Phosphorus nuclear magnetic resonance study of the rat kidney in vivo. *Robert S. Balaban, David G. Gadian, and George K. Radda.* 575

Ionic requirements of proximal tubular fluid reabsorption: Flow dependence of fluid transport. *R. Green, R. J. Moriarty, and Gerhard Giebisch.* 580

Flow dependence of fluid transport in the isolated superficial pars recta: Evidence that osmotic disequilibrium between external solutions drives isotonic fluid absorption. *James A. Schafer, Susan L. Troutman, Mary L. Watkins, and Thomas E. Andreoli.* 588

Ammonia partitioning between glutamine and urea: Interorgan participation in metabolic acidosis. *V. Phromphetcharat, A. Jackson, P. D. Dass, and T. C. Welbourne.* 598

Renal lesions and proteinuria in the spontaneously hypertensive rat made normotensive by treatment. *Leonard G. Feld, Judith B. Van Liew, Jan R. Brentjens, and John W. Boylan.* 606

Renal hemodynamics and renal kinins after angiotensin-converting enzyme inhibition. *Barbara H. Clappison, Warwick P. Anderson, and Colin I. Johnston.* 615

Effects of inhibition of prostaglandin synthesis on fetal renal function. *James R. Matson, John B. Stokes, and Jean E. Robillard.* 621

Glomerular immune injury in the rat: Effect of antagonists of histamine activity. *Curtis B. Wilson, Leslie C. Gushwa, Orjan W. Peterson, Bryan J. Tucker, and Roland C. Blantz.* 628

Studies on the regulation of hydrogen ion secretion in the collecting duct in vivo: Evaluation of factors that influence the urine minus blood P_{CO_2} difference. *Siu-Cheung Tam, Marc B. Goldstein, Bobby J. Stinebaugh, Ching-Bun Chen, André Gougoux, and Mitchell L. Halperin.* 636

Studies on the mechanism whereby acidemia stimulates collecting duct hydrogen ion secretion in vivo. *André Gougoux, Patrick Vinay, Guy Lemieux, Maria-Angelica Duran, Ching-Bun Chen, Marc B. Goldstein, Bobby J. Stinebaugh, Siu-Cheung Tam, and Mitchell L. Halperin.* 643

Adenylate cyclase and cell cyclic AMP of rat cortical thick ascending limb of Henle. *Shozo Torikai, Maw-Song Wang, Keith L. Klein, and Kiyoshi Kurokawa.* 649

Role of the medullary collecting duct in potassium excretion in potassium-adapted animals. *Donald A. Schon, Karen A. Backman, John P. Hayslett.* 655

CLINICAL INVESTIGATION

Renal function and biopsy findings in patients on long-term lithium treatment. *Mattias Aurell, Christian Svalander, Leif Wallin, and Christer Alling.* 663

Renal pelvic neoplasms and atypical urothelium in patients with end-stage analgesic nephropathy. *Ingemar Blohme and Sonny Johansson.* 671

NEPHROLOGY FORUM

Familial Mediterranean fever and amyloidosis. *Panagiotis Metaxas.* 676

Table of contents

SYMPOSIUM ON PEDIATRIC NEPHROLOGY

Inhibition by indomethacin of adaptive changes in the contralateral kidney after release of unilateral ureteral occlusion. *Norman J. Siegel, Kirti Upadhyaya, and Michael Kashgarian.* 691

Etiology and pathogenesis of the prune belly syndrome. *Eberhard Straub and Jürgen Spranger.* 695

Renal handling of water and sodium in infancy and childhood: A study using clearance methods during hypotonic saline diuresis. *Juan Rodriguez-Soriano, Alfredo Vallo, Gonzalo Castillo, and Roberto Oliveros.* 700

The Fanconi syndrome and mechanisms of tubular transport dysfunction. *Karl S. Roth, John W. Foreman, and Stanton Segal.* 705

Children with urinary infection: A comparison of those with and those without vesicoureteric reflux. *Jean M. Smellie, I. C. S. Normand, and G. Katz.* 717

Endarterial urokinase in childhood hemolytic uremic syndrome. *Robert W. A. Jones, Max C. Morris, Michael N. Maisey, Hugh M. Saxton, and Cyril Chantler.* 723

Circulating immune complexes in membranoproliferative glomerulonephritis. *Charles A. Davis, Harold Marder, and Clark D. West.* 728

Reflux nephropathy: Effects of antimicrobial therapy on the evolution of the early pyelonephritic scar. *Philip G. Ransley and R. A. Risdon.* 733

Primary nephrosis in childhood associated with focal glomerular sclerosis: Is long-term prognosis that severe? *Jean-Guy Mongeau, Louise Corneille, Pierre Robitaille, Sean O'Regan, and Micheline Pelletier.* 743

Scanning electron microscopic study of normal human glomerulogenesis and of fetal glomeruli in congenital nephrotic syndrome of the Finnish type. *Helena Autio-Harmainen, R. Väänänen, and J. Rapola.* 747

Renal function in acute febrile urinary tract infection in children: Pathophysiologic aspects on the reduced concentrating capacity. *Ulla Berg.* 753

Compensatory kidney growth in children with urinary tract infection and unilateral renal scarring: An epidemiologic study. *Ingemar Claësson, Bo Jacobsson, Ulf Jodal, and Jan Winberg.* 759

Primary nephrotic syndrome in children: Clinical significance of histopathologic variants of minimal change and of diffuse mesangial hypercellularity. *A Report of the International Study of Kidney Disease in Children.* 765

LABORATORY INVESTIGATION

Vanadate inhibits urinary acidification by the turtle bladder. *Jose A. L. Arruda, Sandra Sabatini, and Christof Westenfelder.* 772

Filtered bicarbonate and plasma pH as determinants of renal bicarbonate reabsorption. *Harald Langberg, Øystein Mathisen, Hallvard Holdaas, and Fredrik Kiil.* 780

Morphometry and fluid reabsorption during peristaltic flow in hamster renal papillary collecting ducts. *Bodil Schmidt-Nielsen and Larry N. Reinking.* 789

NEPHROLOGY FORUM

Renal tubular acidosis in childhood. *Elisabeth McSherry.* 799
